

Directions for Use

To treat 3,000 animals, prepare a diluted Finalyse bacteriophage solution by adding one 1,000-ml container of bacteriophage concentrate to 26 liters of water in a mix tank. Spray the diluted solution over the entire hide of the animal. It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

Precautionary Statements

Storage and Disposal

This product should be refrigerated to maintain viability. Store at 4° - 8° C. Do not freeze.

Triple rinse empty containers. Then offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill, or incinerate following local and state restrictions. If burning the containers, stay out of the smoke.
