CLARIFECT™

CLARIFECT is an EPA-registered disinfectant for use as a fungicide, algicide, Slimicide and Microbiocide in water transfer line systems. CLARIFECT controls biofilm deposits and other organic contaminants in industrial tanks, pumps, piping and tubing associated with water transfer line systems. CLARIFECT disinfects gram-negative organisms in animal, livestock and poultry drinking water lines, Air chill water and cooling spray lines. Clean-in-place Limited disinfection of water lines.

Active Ingredients

Sodium bromosulfamate and sodium chlorosulfamate	18%
Other ingredients	82%

Directions for Use

WATER TRANSFER LINE SYSTEMS

Not for use in food processing equipment, human drinking water systems or dental lines. CLARIFECT can be used to remove and control biofilm deposits and other organic contaminants in industrial tanks, pumps, piping and tubing associated with water transfer line systems.

DOSAGE RATE: Fill water transfer line equipment as completely as possible with a solution of one (1) ounce of product diluted in one (1) gallon of water. Introduce this use solution to the transfer line system. Soak or circulate the use solution for at least 4 hours. Drain the system. Rinse the system thoroughly with potable water prior to using the water transfer lines. Not for use in water transfer line systems in the State of California.

CLEAN-IN-PLACE LIMITED DISINFECTION OF WATER LINES

This product can be used to disinfect Gram-negative organisms in tanks, pumps or medicators used to deliver the product, piping and tubing associated with water lines in animal, livestock and poultry housing facilities. The water lines can be used for delivering drinking water, air chiller water and cooling spray lines. Prior to use in the water lines, remove all animals, livestock or birds from premises. Do not reintroduce animals, livestock or birds until treatment is complete and water lines have been thoroughly rinsed with potable water.

DOSAGE RATE: Apply the product via a chemical feed pump or medicator at a dose of one (1) ounce of product per one (1) gallon of water (1:128) into the pipes. Fill water lines until the full flow is obtained at all extremities, the system is completely filled with the disinfectant solution and all air is removed. Close drain valves and soak or circulate the disinfectant solution for a minimum of 4 hours. Drain the system. Flush the system thoroughly with potable water prior to using the water lines.

Not for use in water lines in the State of California. It is a violation of federal law to use this product in a manner inconsistent with its labeling.

Packaging

CLARIFECT is available in a 1-gallon (3.8 liter) bottle size.

Storage and Disposal

Do not contaminate water, food or feed by storage, disposal or cleaning of equipment.

CLARIFECT™
INFORMATION

CLARIFECT™ INFORMATION

STORAGE: Avoid freezing, excessive heat or exposure to light, especially direct sunlight. If heating is necessary to prevent freezing, care must be taken to prevent overheating. The average product temperature should be maintained below 110° F. Temperature monitoring is recommended. At elevated temperatures, self-heating can lead to vigorous gas generation and over-pressurization of storage containers.

STORAGE CONTAINER: Vented and opaque containers: The product should be stored in vented containers as pressure can build-up in the headspace (nitrogen). To maximize product shelf life, store in opaque containers in a cool, dry, well-ventilated area.
